

EDUCATION AND TRAINING SCIENCES

Educator in Socio-Educational Services

The Bachelor's Degree or Baccalaureate course in **Education and Training Sciences** via **Educator in Socio-Educational Services** prepares social educators capable of working with an integral vision of the person and of education in formal and informal structures and services for all developmental stages, with a particular focus on childhood, family, social disadvantage and minority marginality, interculture and educational animation.

Career opportunities

At the end of the course of study, graduates will be able to work as:

- educators and consultants in educational planning in residential and semi-residential socio-educational services both public and private for minors, families, the disabled, the elderly and immigrants;
- educators and trainers in cultural promotion centres, in non-profit organisations and tutors in work-linked education and training programmes;
- socio-educational childcare workers in play centres for minors.

The Bachelor's Degree course programme provides the requisites for admission to the Master's Degree course in **Pedagogical Sciences** main field **Pedagogist in Socio-Educational Services** offered by the Faculty.

or baccalaureate*

Learning outcomes

- to have acquired adequate knowledge and understanding of content and research methods in education and training sciences;
- to know how to identify emerging educational and training problems in the current socio-cultural reality and how to interpret them in the light of coherent scientific criteria and an integral vision of the person and education;
- to analyse the educational and training needs of the growing person and the group, that they can design and implement educational programmes for socio-educational services and direct and indirect parenting support;
- to have acquired the communication and relational skills necessary for team work and educational interaction both on an individual and institutional level;
- to be able to observe and evaluate educational and didactic situations also through the experience of training as a moment of synthesis between theory and practice;
- to have acquired sufficient digital competency for communication, information management and educational-didactic intervention;
- to know and use a foreign language.

Teaching and learning

The Bachelor's Degree Course covers three years, during which 180 ECTS credits must be obtained. To obtain the credits required to graduate, students must carry out the required training activities (courses, seminars and workshops) and an internship, as stated in the study programme.
